PKR2: A new architecture for a high performance money.

PKR2 Token is a **Decentralized, Unstoppable** and **Trustless** Money; Powered by PKR2 Smart-Contract on Solana block-chain; with Fixed Supply of 21,000,000; that protects assets value from fiat currencies inflation.

Powered by SOLANA

Decentralized: peer-to-peer, unstoppable, trustless and fully censorship-resistant smart-contract.

Fixed Supply: 21,000,000.

User friendly: easily Use; SOL (Solana Native Coin) addresses and wallets; for receive and send PKR2 Tokens.

Ultra-Fast: The main block chain network of PKR2 Smart-Contract, Solana; is the fastest block chain in the world with over thousands of transactions per second. (live transactions speed on https://solana.com/).

Block Time: 400 ms.

Low cost: PKR2 Transactions Fee is almost free.

Scalable: Scale for Global Adoption. (low cost and fast, Forever)

Fourth Generation block-chain algorithm (PoH): New blockchain architecture based on "Proof of History" (PoH) - a proof for verifying order and passage of time between events. PoH is used to encode trustless passage of time into a ledger - an append only data structure. When used alongside a consensus algorithm such as Proof of Work (PoW) or Proof of Stake (PoS), PoH can reduce messaging overhead in a Byzantine Fault Tolerant replicated state machine, resulting in sub-second finality times.
